OAKES COMMUNITY HOSPITAL FOUNDATION CONTINUES!

The Firm Foundation and Change

Change is a term that now defines healthcare in our nation. Nationwide hospitals struggle with inadequate reimbursements for services while trying to provide their patients the highest level of care.

Quality care is necessary and requires a commitment to investing in top-notch technology, well-trained and qualified staff, and a line of services which best meets the needs of the community. Some decisions are difficult to make regarding services we can provide. Your local hospital is purposefully led forward to address changes in healthcare and still create a solid fiscal foundation. We have closed some departments that could not be made profitable but also are proactively adding new services that can be profitable and benefit the people in the area. We will continue to evaluate all service lines and change to meet the needs of the people. If you have ideas please contact us!

We make long term decisions to strengthen our community. Changing to programs that provide strong revenue streams to build our economic base, the choice to develop local clinics in Oakes and LaMoure has been a solid one. We have had 20% growth in staff in adding these clinics which provides more jobs and money in the community. We also have had a 25% increase in net patient service revenue that will help support our facility and build a stronger hospital.

By providing support for Oakes Community Hospital (OCH) Foundation your tax deductible contribution can be used for changes and enhancements to healthcare.

Contributions to The Foundation at Oakes Community Hospital (OCH), helps build the resources that support the goals of the hospital, providing services with compassion and grace. All donations to The Foundation remain local and helping improve the healthcare in our area.
